

SAFE-T-TOP™ SHOWER CURTAINS SPECIFICATION SHEET

VINYL

Shower
Curtains,

Material Name

Color

As manufactured by Hospi-Tel, with SAFE-T-TOP™ 1 3/8" triple thick top hem consisting of one ply of the curtain material, a 1 1/8" reinforcement header strip of closely woven mesh, covered by a 6 gauge clear strip of vinyl; SAFE-T-TOP™ to be sewn with double needle construction, 1 1/8" between stitching rows. Top hem to also have two-piece rustproof anodized aluminum grommets on 6" centers (use of single grommet with crimped undersides is not acceptable). Height tolerance is $\pm 1"$.

There is no bottom hem, allowing for easy run-off of soap and water.

Vinyl to be formulated with an anti-microbial to insure maximum mildew resistance for the life of the shower curtain.

Quantity and sizes are as follows:

FABRIC

Shower
Curtains,

Material Name

Color

As manufactured by Hospi-Tel, with SAFE-T-TOP™ 1 3/8" triple thick top hem consisting of a double layer of curtain material with an inserted 1 1/8" reinforcement header strip of closely woven mesh. SAFE-T-TOP™ to be sewn with double needle construction, 1 1/8" between stitching rows. Top hem to also have reinforced sewn buttonholes on 6" centers. Height tolerance is $\pm 1"$.

All curtains to have full length double thick turned 1/2" side hems locking the left and right sides of the curtain from top to bottom, thereby eliminating raw side edges.

There is to be a reverse double thick turned 1/2" bottom hem, eliminating raw bottom edge and allowing for easy run-off of soap and water.

Polyester and Nylon to be treated with durable water repellent finish to insure water and stain repellency.

Quantity and sizes are as follows:
